

AI-Audit Staff Training Bootcamp

The Challenge

Most AI training creates awareness, not actual capability. Teams learn that AI matters, try a generic tool, get weak results, and abandon it within weeks. If training doesn't permanently change how your team tackles real projects, it's just a seminar. Under the 2024 IIA Standards, you need staff with proven professional skills, not just attendance certificates.

Our Value Proposition

This 5-module, 7.5-hour training program delivers proven operational capability, not just basic awareness. Available live or on-demand, it guarantees three measurable results: a ready-to-use prompt library for immediate project work, documented competency ratings to show leadership proof of development, and professional certificates for your team.

ESSENTIALS

Self-Paced training
Participant workbook

Prompt library –
Core audit tasks
Skills assessment
+ **answer key**
Competency rubric
+ certificate template

Best for. Teams with internal facilitation capacity that need a complete, ready-to-deliver training package.

INTENSIVE

Everything in Essentials, PLUS:

AI-Audit Staff Training Bootcamp

Many teams use AI, but few use it safely or effectively. This gap leads to unverified data, fabricated citations, and inconsistent results. The AI Audit Staff Training Intensive fixes this. In just five hands-on sessions, your entire team will master reliable AI skills using real project tasks—ready to apply on their very next assignment.

Your team will receive:

MODULE 1. AI-Foundations for Auditors

Participants will be able to understand how AI works, where it fails, what the standards require, and how to document and disclose AI use

MODULE 2. AI-Prompting for Audit Tasks

Building on Module 1, participants will learn the prompt framework that produces audit-quality output, and practice it on real audit tasks before you leave.

MODULE 3. AI-Validation and Quality Control

Participants will gain the the skill that most training programs skip entirely: validating AI output before it enters a workpaper. You will work through real AI-generated outputs with planted errors — and learn to catch every one.

MODULE 4. AI-Applying AI in Your Audit Cycle

Participants will integrate, the foundation, the prompts an the validation skills into a real, end-to-end audit engagement — from risk assessment through follow-up.

MODULE 5. AI-Risks. Auditing the AI Your Organization Uses

Participants will learn to audit the AI systems organizations are deploying in their business processes.

Five sessions. A prompt library that lasts. A team that uses AI right.

Schedule a 30-minute discovery call. No commitment required.
