

AI-Powered Audit: From Pilot To Production

Escape the AI
"pilot purgatory."

Build an AI-Enabled
Audit Function That
Actually Works

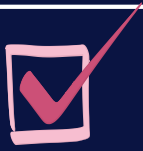

Despite **88%** of teams experimenting with AI, industry data shows that the majority remain in experimenting or piloting stages, with approximately **one-third** reporting they have begun to scale. This session provides practical frameworks to bridge that gap, helping you escape the "pilot purgatory" and build sustainable, AI-driven capabilities. You will learn seven actionable strategies and receive a complete toolkit ready for immediate implementation. We will cover these key areas:

Why Pilots Fail: Six fatal mistakes and the cost of pilot purgatory

AI Maturity Assessment: 4-level framework and advancement strategies

Building Capabilities: Team development, governance, and roadmap creation
